

Parents of Incoming Third Graders

Knowing the expectations of our math curriculum, we encourage all students to practice their addition and subtraction facts (0-20) during the summer. Flash cards can be purchased at the Dollar Store, GW's, or your child can simply make their own at home.

Another recommendation is to visit your local library once a week.

Reading is a major part of our curriculum, and we encourage every student to read every day.

A strong reader becomes a stronger student.

Thank you,
The 3rd Grade Teachers
