Optional Supplies:

Dry erase markers/whiteboards

Personal headphones for computer lab

Pencils

Pencil pouch, **boxes won't fit in student's desk**

To: Incoming Fourth Grade Parents

Knowing the high expectations of our math curriculum, we would encourage all students over the summer to practice their multiplication and division facts (1-9) prior to beginning fourth grade. Multiplication flash cards can be purchased at the Dollar Store, GW's or your child can simply make some at home to review. There is also a website called www.mathfactspro.com that would be helpful as well.

Visit your local library. Reading comprehension is a major part of our fourth grade program, so we encourage students to continuously read every day. A strong reader becomes a strong writer.

According to the fourth grade common core standards, students are expected to type a full page essay in one sitting. Therefore, we suggest keyboarding practice at home.

Our goal is to see your child succeed next year. This would be the first step in that process. We look forward to meeting all of you in August.

Sincerely,

The Fourth Grade Team
